3D Floor Plans

**Layout & Assembly of Custom Control Panels**
Many customers find value using **BUILDTECH AUTOMATION** panel shop to design and build control panels to custom fit their application. Our design engineers work in conjunction with our customers to develop designs that lower installation time, eliminate start-up issues, and decrease the total cost of installation.

**Online and Onsite Commissioning Support**
We operate 24 hours a day, seven days a week. Our priority is your project safely completed on time.

**Complete Turnkey Solutions**

At **BUILDTECH AUTOMATION'S** custom manufacturing workshop, we realize that no two projects are identical.

We are specialists in the control of commercial and industrial equipment with UL 508 Certification. We can manufacture building automation products to your exact specification. Custom panel designs, layouts, installation/wiring of equipment. Complete Quality Control (QC) & Factory Acceptance Testing.
